#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION*****Claim Objections***

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not). Misnumbered claim 25 (second occurrence) been renumbered "26".

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent no. 5,193,762 to Takeuchi. With respect to claim 18, Takeuchi, for example in Figures 3, 5 and 6, discloses a method of manufacturing a spinning reel rotor, comprising the steps of: providing a cylindrical portion 1, first 2 and second (unnumbered) rotor arms that are connected to the cylindrical portion, and a bail 3; attaching the bail 3 to front ends of the first 2 and second rotor arms; providing a first cover (not shown) and attaching the first cover to the front end the first rotor arm, where the bail is attached; providing a plurality of second covers (2', 6) each having a mass adjustment portion 6

Art Unit: 3654

formed thereon; attaching one of the plurality of second covers to the front end of the second rotor arms, where the bail is attached; the mass adjustment portion 6 of each of the plurality of second covers (in Figures 3 and 5, for example) differing in shape; there is at least one perforating through hole (hole through which screw 8 is inserted). Figure 4 disclose a chamfer and depression.

Takeuchi does not disclose that the difference in weight between any two of plurality of second covers is less than 1g. However, one of ordinary skill in the art would want to maintain the balance of the rotor while using different shapes of element 6. It would have been obvious to one of ordinary skill in the art to make the weight between any two of plurality of second covers less than 1g so that the rotor balance will be substantially the same.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
